

AN IMPARTIAL LIST OF PROBLEMATIC INGREDIENTS

IF YOUR PRODUCT CONTAINS THESE INGREDIENTS,
YOU MUST VERIFY THEIR SOURCE BEFORE POSTING

VINEGAR • ACETIC ACID

Vinegar - as well as acetic acid - can be produced from both Chametz and Kitniyot ingredients. Please verify source of vinegar with manufacturer before posting product.

If vinegar source is specified in the ingredients label, then there is no need to verify source of vinegar. **For example:** apple cider vinegar, white wine vinegar, balsamic vinegar, rice vinegar, etc.

FOOD STARCH • DEXTRIN • MALTODEXTRIN

Food starch (also modified food starch), dextrin, and maltodextrin - can be produced from both Chametz and Kitniyot ingredients. Please verify source of these ingredients with manufacturer before posting product.

If ingredient source is specified in the ingredients label, then there is no need to verify source. **For example:** wheat, corn, potato, tapioca, etc.

VANILLA

Vanilla - also vanilla extract - is often made with alcohol can be produced from both Chametz and Kitniyot ingredients. Please verify source with manufacturer before posting product.

ALCOHOL

Alcohol, as a food ingredient, can be produced from both Chametz and Kitniyot ingredients. Please verify source of alcohol with manufacturer before posting product.

A reminder: it is the Rabbi's policy not to approve of alcoholic beverages even during the year. You are welcome to consult with the lists provided by other agencies to determine the Kashrut status of alcoholic beverages.

YEAST

Se'or, which is prohibited for consumption on Pesach, does not refer to modern yeast. However, yeast is a microorganism propagated on various media which can complicate it's Kashrut status for Pesach. Therefore, though they may not actually contain Chametz, we do not research products which contain yeast in them.
